

**“ MORE THAN JUST
GOOD PRODUCTS ”**

**EXPERTS IN
TRANSFORMERS**

SPECIALISTS ON **DESIGN & MANUFACTURE** INDUCTIVE COMPONENTS

Pomceg Electronics is specialised in the **design and manufacture of transformers and inductive components**, offers customized and quality solutions for its customers.

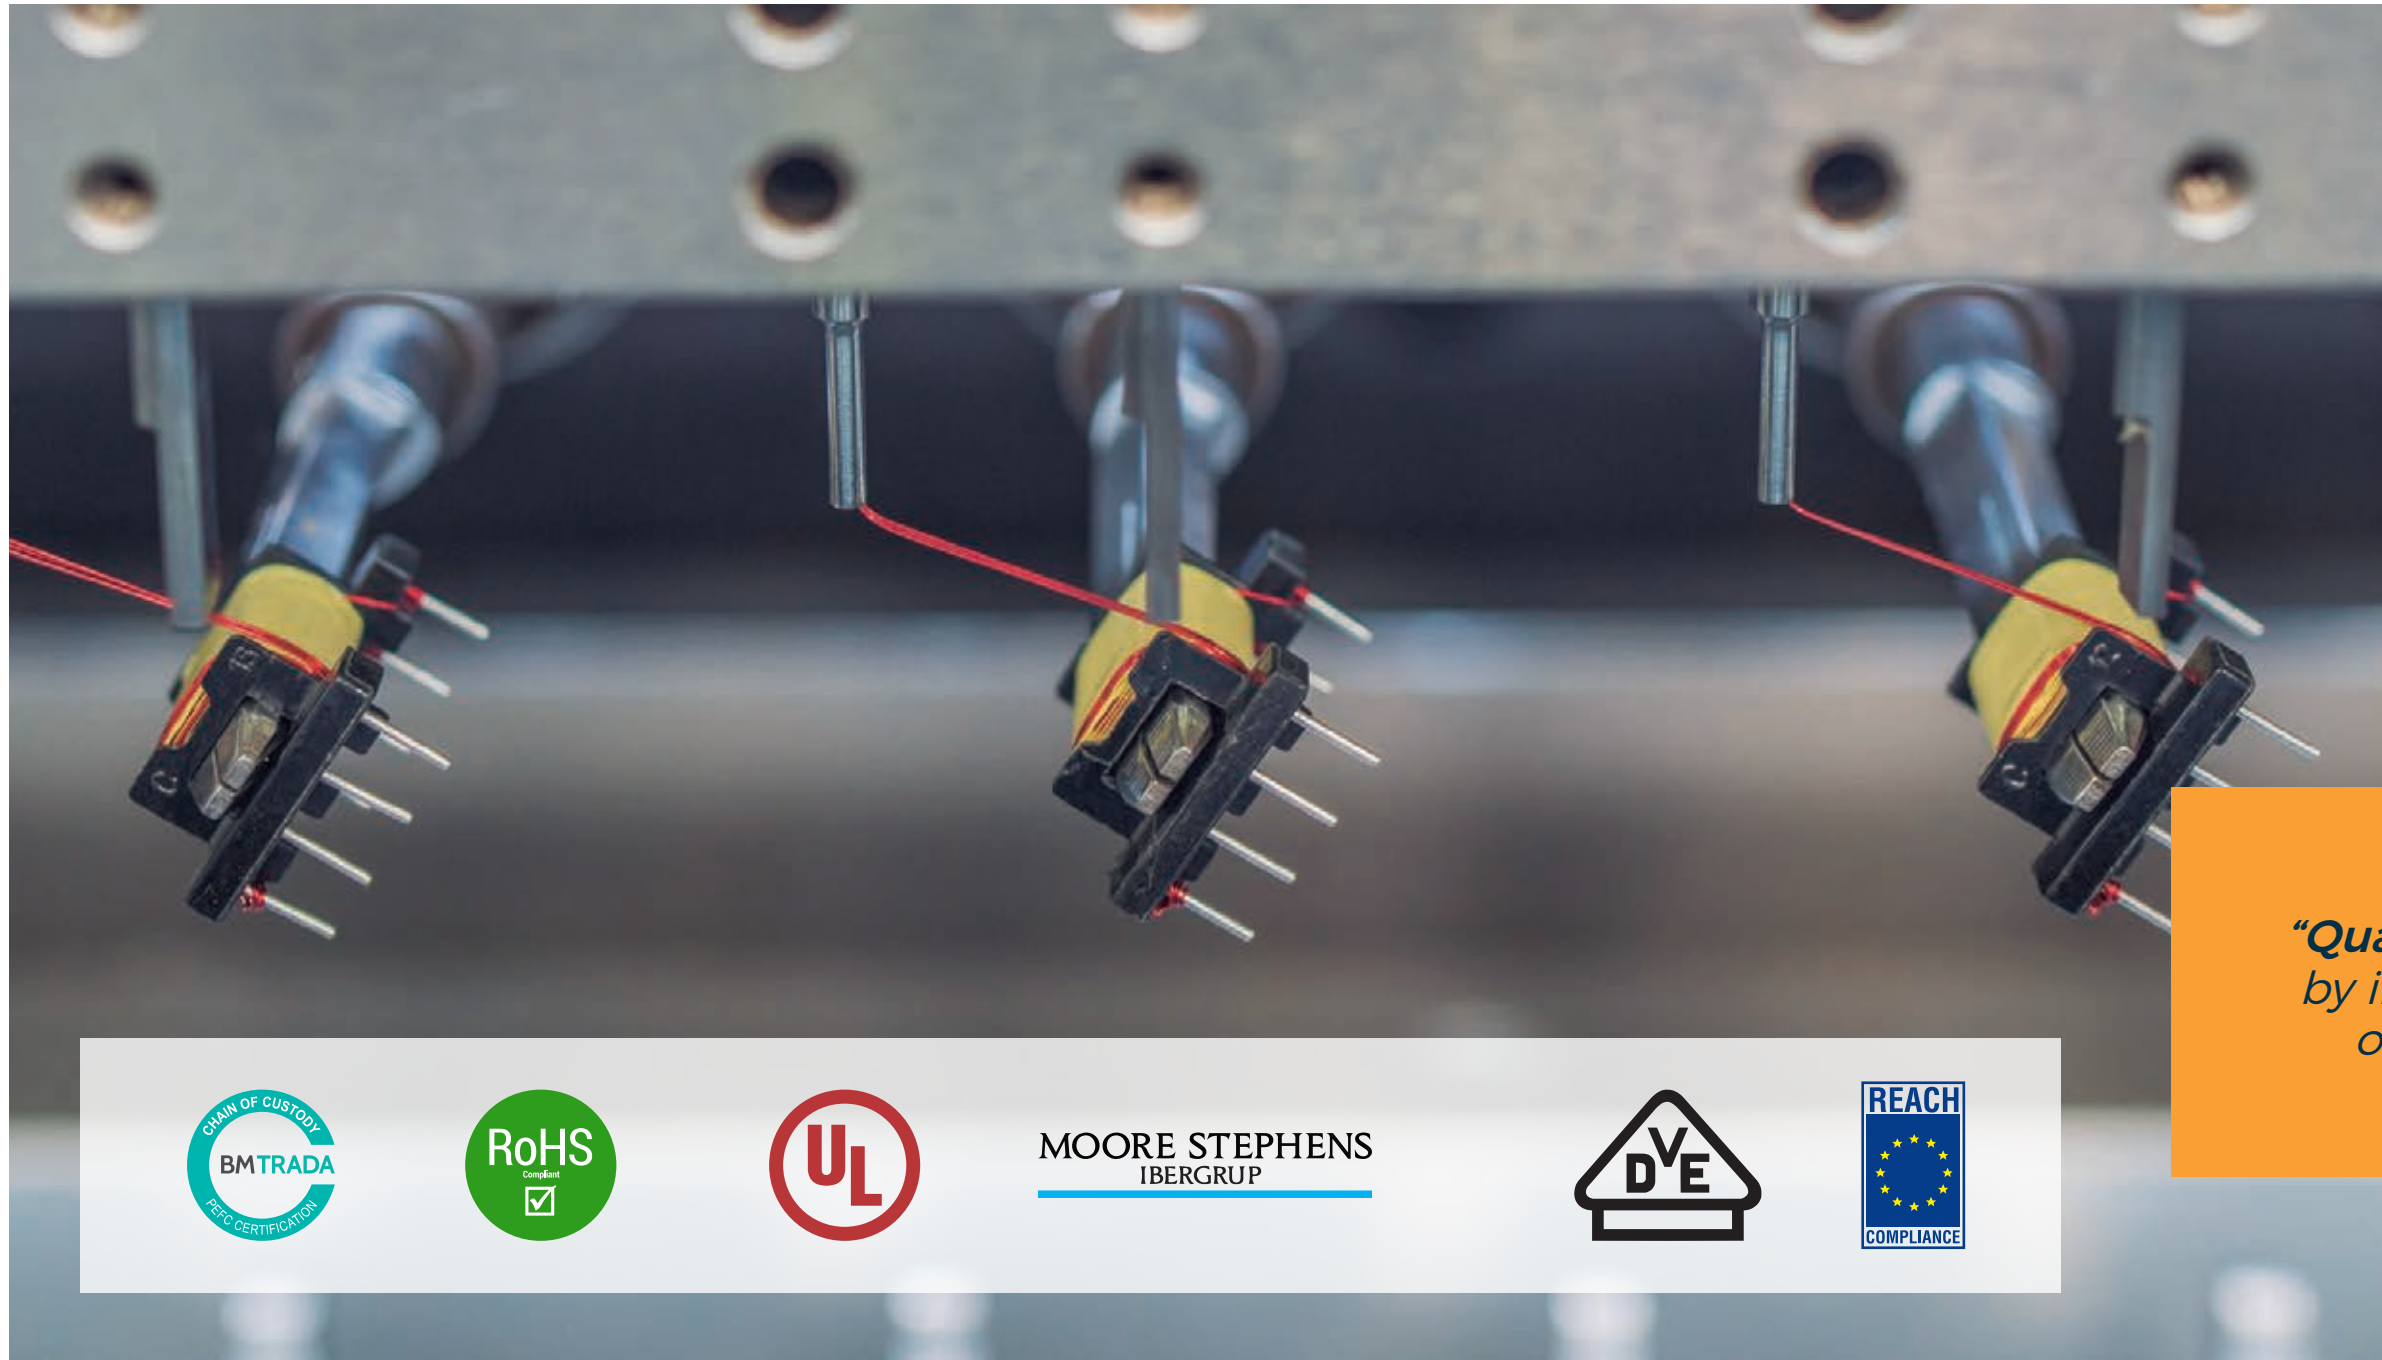

With more than 10 years of experience, our team is used to manage projects with high degree of technical and technological requirements.

Our factory, located in Zaragoza (Spain) with more than 1.000 m2 is suitably equipped to produce small, medium and large series.

It is our headquarter that we carry out design and production of our products **for our European customers.**

"Full Automatic production lines in Spain with a current monthly production capacity of up to 400.000 units"

Technical accuracy and quality of our productions are guaranteed throughout the **obtained certificates**, confirming that the produced item, can be supplied with the insurance to be fully in accordance with all quality requirements.

At Pomceg we are also **committed to social ethics** and we avoid using any type of material whose origin could violate human rights.

SPECIALISTS ON **CUSTOMIZED** INDUCTIVE COMPONENTS

The core business of Pomceg Electronics is the design and production of **customized inductive components**, offering personalized solutions for each customer.

Our experience, together with innovation and latest technologies used, allow us to supply all **our transformers, including THD ones**, for an easily automating process during their insertion on the PCB, generating an important cost reduction for our customers.

For Pomceg Electronics, to know that our customers are acquiring quality products is basic. For this reason, we only use **UL certified materials**.

is close to 0%"*

PRODUCTS PORTFOLIO

LOW FREQUENCY TRANSFORMERS

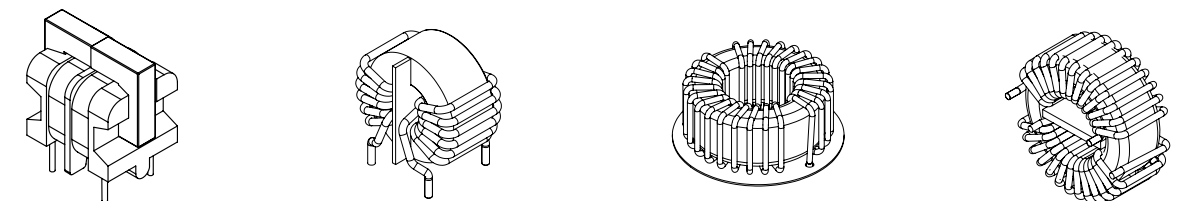

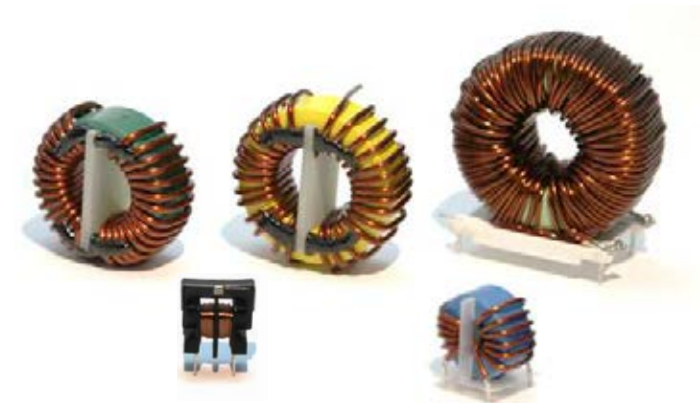

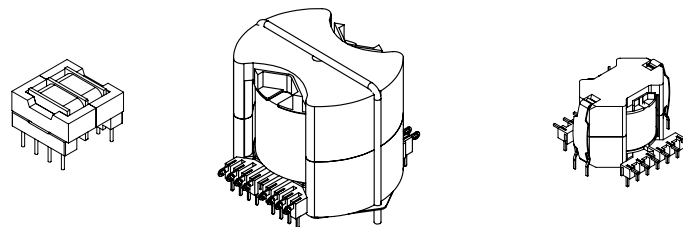

We have several types according
to the required power range.

HIGH FREQUENCY TRANSFORMERS

Full automatic production process for their end
application on Switching Mode Power Supplies (SMPS)

INDUCTANCE, FILTERS & CHOKES

100% customized.

SERVICES

At Pomceg Electronics we continuously looking for customer's satisfaction, and for this reason **we can supply samples and prototypes** manufactured in our own internal laboratory.

In addition, for large productions, we **manufacture, in our production lines, pre-series for homologation.**

For us, projects for large quantities are not a problem and we guarantee **just in time deliveries.**

"On time Anywhere"

During all these years, our transformers and inductive components are **used in different sectors such as** Domestic Appliances, Metering, Vending, Lighting, Medical or Renewable Energy.
